## Contract signed

On 23<sup>rd</sup> July Michel Martel, director of our French daughter company, and JDN Sales Director Michael Schultheis signed a cooperation contract.

With the conclusion of this contract J.D. Neuhaus S.A.R.L. is now responsible for the market of the whole African continent.

## JDN Air Cranes and Crane Kits

JDN Air Cranes in standard version are suitable for working in hazardous areas.

The delivery programme includes:

- Overhead cranes
- Suspension cranes as well as Slewing cranes

which can be adapted to your individual demands as complete special installations, also with hydraulic drive, are our speciality.

Different JDN Cranes in detail:

- Overhead cranes with one or two main girders
- Suspension cranes also with minimised headroom – with special low headroom trolleys
- Slewing cranes
- Cranes with mechanically coupled synchronised hoists
- Cranes with parallel hoists

J.D. Neuhaus offers crane manufacturers component kits with pneumatic drives.

With these crane kits overhead travelling cranes up to 10 t capacity can be built very simply and economically, especially for applications in hazardous areas.

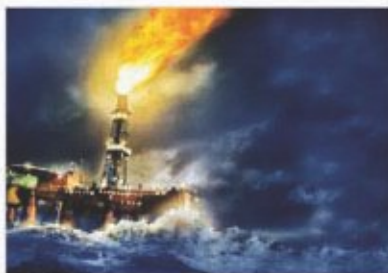

The crane manufacturer provides the main girder and JDN delivers all the components that are necessary to build an air powered crane:

- End carriages with pneumatic drives
- Energy feeding systems
- Safety accessories
- and of course the appropriate air hoist with trolley

For further information on JDN Cranes and Crane Kits please ask for the brochure "AB 103".

## Offshore Europe 2009

What's new in offshore hoisting?

Visit our team at the Offshore Europe in Aberdeen, 8<sup>th</sup> to 11<sup>th</sup> September. There you can experience the red-hot power of air when moving loads.

We are looking forward to seeing you in the "Red Zone", booth no. 692.
