Tip of the Month

JDN Monorail Air Hoists and Low Headroom Trolleys are optionally available for curved beams.

JDN in Application

JDN Slewing Crane with a Mini 250 feeding a turning machine with vulkolan wheels.

OTC 2007

More than 67.000 offshore experts from 110 countries met at OTC to learn about the latest technologies. Thanks to all who helped us to make this fair so successful.

Electronic Load Indicator for JDN Monorail Hoists

For knowing at any time the weight of the hooked load we offer an electronic load indicator for JDN Monorail Hoists and Trolleys.

By using a gauge bolt instead of the trolley bolt this gauge bolt passes the value on to a digital indicator. The indicator is mounted on the pendant control so that the weight of the load can be permanently observed.

The whole system is particularly suitable for application in hazardous areas.

Choose the Original – Choose Success

**Choose the Original
Choose Success!**

Following this adage the VDMA (Association German Engineering and Plant Construction) has started a campaign at the Hanover Fair and Bauma. With this campaign the awareness of the value of Original Technologies shall be improved.

JDN will take part in this campaign. You can benefit of it, too.

Manufacturer of Original Products

- guarantee for durability and long-life cycle
- guarantee for application even under extreme conditions
- offer comprehensive maintenance and spare part service
- stay for long-term partnerships
- care for trouble-free production
- offer an optimal cost/performance ratio
- provide safety
